

vvenc::InterSearch  
::loadGlobalUniMvs

vvenc::InterSearch  
::predInterSearch

insertUniMvCands

```
graph LR; A["vvenc::InterSearch  
::loadGlobalUniMvs"] --> C["insertUniMvCands"]; B["vvenc::InterSearch  
::predInterSearch"] --> C;
```

The diagram illustrates a control flow or dependency. Two source functions, 'vvenc::InterSearch::loadGlobalUniMvs' and 'vvenc::InterSearch::predInterSearch', are shown in white boxes on the left. Arrows from both point to a single target function, 'insertUniMvCands', which is shown in a gray box on the right.
