

isByteAligned

```
graph LR; A[isByteAligned] --> B["venc::OutputBitstream::getNumBitsUntilByteAligned"]
```

The diagram consists of two rectangular boxes connected by a horizontal arrow. The left box is shaded gray and contains the text 'isByteAligned'. A blue arrow points from the right side of this box to the left side of a white box on the right. The white box contains two lines of text: 'venc::OutputBitstream' on the top line and '::getNumBitsUntilByteAligned' on the bottom line.

venc::OutputBitstream  
::getNumBitsUntilByteAligned
